SUMMARY

Software Engineer with 3+ years of experience and a strong frontend focus, specializing in React, Next.js, and TypeScript, with full-stack experience in Ruby on Rails and Node.js/NestJS. Experienced in building production web applications, REST APIs, automated testing, and AI-assisted development workflows.

PROFESSIONAL EXPERIENCE

Software Engineer, *Hospedin* 🔗

06/2026 | Remote, Brazil

- Develop full-stack features across a Ruby on Rails platform and React/TypeScript applications, working with REST APIs, business rules, integrations, and user-facing product flows.
- Implement OAuth 2.0 flows for the platform API, including client registration, authorization and consent, token issuance and renewal, authentication, rate limiting, background jobs, and automated tests.
- Build and evolve payment and billing features in React and TypeScript, implementing discounts, validations, payer information, legacy-data compatibility, and business rules across critical financial flows.
- Contribute to application quality and delivery through automated backend and frontend testing, staging validation, production releases, and AI-assisted engineering workflows based on Spec-Driven Development (SDD).

Fullstack Engineer, *SB Flex* 🔗

06/2025 – 05/2026 | Remote, Brazil

- Progressed from a frontend-focused role into full-stack development, building and evolving applications with React, Next.js, and TypeScript while contributing to Node.js/NestJS APIs and backend business logic.
- Worked with undocumented and highly coupled codebases inherited from external software houses, mapping technical debt, assessing maintainability, and incrementally refactoring critical areas.
- Took on increased technical ownership during the transition of systems back to external partners, producing technical assessments used by the CTO, defining improvement requirements, and reviewing third-party code deliveries.
- Improved engineering quality through automated code-review workflows, pre-commit hooks, and CI checks covering linting, formatting, and automated tests, while also contributing to the migration from AWS SDK v2 to v3.

Frontend Engineer, *StonePlus*

03/2023 – 03/2025 | Fortaleza, Brazil

- Developed responsive interfaces with React, Next.js, and TypeScript, applying modular component-based architecture and a daisyUI design system to improve consistency and component reusability.
- Implemented SSR and SSG across application pages, using Lighthouse metrics to guide improvements in performance, SEO, and loading times.
- Integrated frontend applications with REST APIs and implemented state management flows using Redux and React Context, while contributing to bug fixes, refactoring, responsive design, and UX improvements.

SKILLS

Frontend — React, Next.js, TypeScript, Redux, React Context, Tailwind CSS

Backend & APIs — Ruby on Rails, Node.js, NestJS, REST APIs, OAuth 2.0

Databases & Infrastructure — PostgreSQL, Redis, Docker

Testing & Quality — RSpec, Vitest, Testing Library, Automated Testing, CI/CD

Engineering Practices — Spec-Driven Development (SDD), AI-Assisted Programming, Code Review, Git, GitHub Actions

EDUCATION

Bachelor's Degree in Information Systems **07/2021 – Present** | Online
UniFanor Wyden [🔗](#)

Full Stack Developer Program **08/2022 – 10/2023** | Fortaleza, Brazil
Digital College [🔗](#)
192-hour in-person professional training program focused on full-stack web development.

LANGUAGES

Portuguese — Native/Bilingual

English — Fluent

Spanish — Conversational

AWARDS

2nd Place — Digital College Hackathon, Digital College **05/2023**
Built a room availability and resource management application in an 8-person team, placing 2nd among 10 teams.
